Alduin Online Whitepaper (v1.0)

Example Document Not Final Whitepaper

This document is a placeholder draft and does not represent the official or finalized whitepaper for Alduin Online. All content is subject to change.

Overview

Alduin Online is a 2D MMORPG that integrates real cryptocurrency utility through the native token $Alduin. Built for nostalgic gamers and blockchain enthusiasts, Alduin Online rewards players for exploration, combat, and participation using decentralized technology.

Game Concept

Alduin Online offers:

- Classic 2D sprite-based world exploration

- PvP and PvE combat

- Player-driven marketplace

- Seasonal events and raids

- Crypto-backed rewards with real-world value

Players earn $Alduin for:

- Completing quests and achievements

- Winning PvP arenas or tournaments

- Selling crafted gear or rare drops

- Holding tokens during staking events

$Alduin Token Utility

$Alduin is used for:

- In-game cosmetics and VIP features

- Trading items in the player marketplace

- Staking for yield and governance rewards

- Access to limited beta content

- DAO voting on game features

Tokenomics

Allocation	% of Supply	Notes
Play-to-Earn	40%	Rewards distributed over 4 years
Team & Advisors	15%	12-month cliff, 2-year vesting
Public Sale	20%	Unlocked for liquidity
Marketing	10%	Airdrops, tournaments, bounties
Treasury/Reserve	15%	For future development & ops

Total Supply: 1,000,000,000 $Alduin

Security

- All contracts are open-source and audited by 3rd-party security firms.

- Tokens are non-custodial users retain control via wallet integration (e.g., MetaMask).

- In-game assets can optionally be bridged to NFTs with on-chain metadata.

Roadmap

Q3 2025:

- Closed beta with staking & PvP system

- Token launch + liquidity provision

- Marketplace testing

Q4 2025:

- Mainnet release of Alduin Online

- $Alduin staking & early governance voting

- NFT cosmetic minting system

2026:

- Cross-chain support (Polygon, BSC)

- DAO governance voting

- Mobile client beta

Governance

Alduin Online will gradually transition into a DAO (Decentralized Autonomous Organization). Token

holders will be able to:

- Vote on key updates (e.g., gameplay changes, economy balancing)

- Submit proposals for seasonal events

- Elect council members for community moderation
